

KEMMAX

Cleanroom Solutions & Controlled Environments

Hero Section — Home Page

Tagline

Engineering Clean. Building Trust.

Short Introduction

KEMMAX delivers end-to-end cleanroom solutions for industries where precision and purity are non-negotiable. From design and supply to installation and validation, we engineer controlled environments built to international standards.

Value Proposition

With deep expertise across pharmaceutical, semiconductor, healthcare, and industrial sectors, KEMMAX is your trusted partner for compliant, high-performance cleanroom environments.

About Us — Page Content

Who We Are

KEMMAX is a specialist cleanroom solutions company dedicated to delivering controlled environments that meet the highest standards of cleanliness, safety, and regulatory compliance. We work with clients across India to design, supply, install, and validate cleanrooms tailored to their exact operational and compliance requirements.

What We Do

We provide a comprehensive range of cleanroom products and turnkey project services — from modular cleanroom systems and HVAC solutions to validation support and compliance documentation. Whether you're building a new facility or upgrading an existing one, KEMMAX handles every stage of the process.

Our Vision

To be the most trusted cleanroom solutions provider in India — recognised for our engineering precision, quality standards, and commitment to every client we serve.

Our Mission

To deliver cleanroom environments that empower our clients to operate with confidence, meet regulatory requirements, and achieve the highest levels of product and process integrity.

Core Values

- Quality — ISO-compliant products and installation at every stage
 - Reliability — on-time delivery and dependable after-sales support
 - Expertise — deep technical knowledge across cleanroom disciplines
 - Integrity — honest, transparent, and accountable in all we do
 - Innovation — continuously improving our solutions and processes
-

Industries We Serve

KEMMAX supports industries where contamination control is critical to product quality, patient safety, and regulatory approval:

- Pharmaceutical & Biopharmaceutical
- Semiconductor & Electronics Manufacturing
- Automotive
- Healthcare Facilities & Hospitals
- Operation Theatre (OT) Construction
- Research & Development Laboratories
- Food & Beverage Processing

Products & Services

Cleanroom Construction & Fit-Out

We design and install modular cleanroom systems built to your specification — softwall and hardwall options, with compatible ceiling, wall, flooring, doors, and entry systems including pass boxes and air showers.

HVAC & Air Filtration Systems

Our HVAC solutions are engineered specifically for cleanroom environments — HEPA and ULPA filtration, Fan Filter Units (FFUs), Air Handling Units (AHUs), and differential pressure monitoring to maintain your required ISO classification.

Cleanroom Furniture & Equipment

We supply ESD-safe and stainless-steel furniture, gowning room equipment, storage solutions, and cleanroom-rated lighting designed to minimise particle generation.

Validation & Compliance Support

KEMMAX supports clients through ISO 14644 classification, particle count testing, and full validation documentation to help meet GMP, FDA, and other regulatory requirements.

Why Choose KEMMAX

- Complete service — design, supply, installation, and validation under one roof
- ISO and GMP-compliant products and practices
- Experienced team with hands-on cleanroom project expertise
- Tailored solutions — we work to your exact specifications and budget
- Reliable after-sales support and maintenance
- Competitive pricing with no compromise on quality

Contact Section — Call to Action

Ready to build your cleanroom? Contact KEMMAX today for a free consultation and quote. Our team is ready to help you engineer the right controlled environment for your facility.
